## **DETAILED ACTION**

### **Claims Cancellation**

1. Claims 2-10 should be canceled (See the Interview Summary).

### ***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the step of comparing the detected current with the reference current must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

3. The drawings are objected to because:

Figures 1, 3, boxes 12-1 through 12-N should be labeled "D/A Conv."

Figure 3, box 52, should be labeled "Signal Control Section".

Figure 5, box 72 should be labeled "Input Latch Circuit".

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for

consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 11-22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,633,167. Although the conflicting claims are not identical, they are not patentably distinct from each other because all of the limitations recited in the claims 11-22 are in claims 1-10.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 11-16, 21, 22, are rejected under 35 U.S.C. 102(b) as being anticipated by Ooishi (6,205,071).

Regarding claims 11-16, 21, 22, Ooishi discloses a method comprising (Figure 20) the steps  
short-circuiting (By closing switches 456-458) each of the plurality of output lines (BLIR, SE1) upon examination; and comparing a current value detected on the short-circuited lines (SE, SE1, BLIR) and a specified current value (Vref4) (Figure 22) to thereby determine whether the signal supply apparatus is good or bad (See also figure 16).

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 19, 20, are rejected under 35 U.S.C. 103(a) as being unpatentable over by Ooishi (6,205,071).

Regarding claims 19 and 20, pertinence to the discussion of claims 11-16 above, Ooishi discloses every subject matter recited in the claims except for the for the use of the circuit in electro-optical elements.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the circuit of Ooishi for using in the electro-optical elements because the use in electro-optical element does not change the function of Ooishi's circuit.
